Dear Sirs

The Codemasters Software Company Limited ("Codemasters")
Ragezone.com (you)
<http://forum.ragezone.com/rf-online/> (the 'Forum')

TAKE DOWN NOTICE

We are writing to you in relation to the above Forum and the online computer/video game known as RF Online. We are formally requesting the removal of the Forum for the reasons provided below.

Codemasters

Codemasters is a leading computer/video game developer and publisher throughout Europe and on an international level. Codemasters has been a leading developer and publisher of computer/video games since on or around 1985 and has built up substantial goodwill within the computer/video game marketplace.

Our products can be purchased by the consumer in most video and computer game retailers throughout Europe as well as through our websites www.codemasters.com or www.codemasters.co.uk (amongst others). From the beginning of January 2006 until the end of May 2006 17,040,980 page impression were requested for the website www.codemasters.com and 11,091,035 page impressions for the website www.codemasters.co.uk alone.

RF Online

RF Online is an online game which can be described as a traditional fantasy MMOG game mixed with a futuristic sci-fi action. The game is set in space, in a particular fictional galaxy known as 'Novus'. The gamer has the option of choosing from three factions (Accretia, Cora and Bellato) in order to take control of the Novus galaxy.

RF Online can be purchased as a 'boxed' product and played online with others as a multiplayer game.

Codemasters has the exclusive license to commercially exploit, including but not limited to, distribution, publishing and offering online services of RF Online. Codemasters is the owner of the official RF Online website http://www.codemasters.co.uk/rfonline/news.php.

From this website, RF Online fans/players can access the following (amongst other things):

1. RF Online Newsletter;
2. RF Online Magazine;
3. General game information;

4. Player Accounts;
5. Ingame Events;
6. Forums;
7. Game Guides;
8. Patches;
9. Video, Artwork and Wallpaper Downloads;

We enclose as Annex A a screenshot of our RF Online website.

The Forum

It has come to our attention that you are the proprietor of the domain name <http://forum.ragezone.com/>. We enclose as Annex B WHOIS database details confirming you as the Registrant.

We have noticed that you have a forum entitled "RF Online". More importantly we note that various users of the Forum have posted information informing other users how to make a private RF server online. In particular we note the posting of "RisingHoly" entitled "How to make ur RF Server online" which informs users of how to set up a private server illegally. We attach a copy of the Forum and the posting as Annex C.

Copyright Protection

As you may well be aware the RF Online game qualifies for copyright protection by virtue of section 1 (1) of the Copyright Designs and Patents Act 1988 ('CDPA') as an original literary and artistic work. The RF Online game qualifies for and is protected by copyright on an international level under the Berne Convention for the Protection of Literary and Artistic Works 1971.

As an exclusive licensee, we would remind you of the provisions of section 101 (1) of the CDPA which states that:

"An exclusive licensee has, except against the copyright owner, the same right and remedies in respect of matters occurring after the grant of the licence as if the licence had been an assignment."

Therefore by virtue of section 101 (1) and section 16 of the CDPA, we have the following exclusive rights in relation to the RF Online computer game:

1. to copy the RF Online game;
2. to issue copies of the RF Online game to the public;
3. to perform, show or play the RF Online game in public;
4. to communicate the RF Online game to the public;
5. to make an adaptation of the RF Online game or do any of the above in relation to an adaptation.

It is important to note that the above rights are to the exclusion of <u>all others</u>, including those using and posting the content of the Forum. Therefore copyright will be infringed by a person who without the licence of the copyright owner does, or authorises another to do, any of the above acts which are restricted by copyright.

Copyright Infringement

RF Online Forum

The attached documentation found at Annex C clearly shows that there are various individuals using your services in order to encourage others to infringe our copyright protected works on the Forum. The creation and hosting of a private RF online service is unacceptable and an infringement of our rights. As we have said, as an exclusive licensee, we have the right to offer, amongst other things, RF Online servers to the exclusion of all other. We cannot allow the content on the Forum to continue being published on your website.

An essential function of copyright is to allow the copyright owner (and exclusive licensee) to control the exploitation of the works protected by copyright. Copyright is essential in ensuring that there is control over the quantity and quality of the online game. We have no control over the quality of the RF Online game server created by those encouraged to do so on the Forum and if the Forum continues it is likely to damage the value in the copyright protected work. Furthermore, the poor and uncontrollable quality of private online servers and their creation without a license affects the exclusivity of our license. We have a duty to both the licensor and to our customers to uphold the exclusivity of our license and the quality associated with it.

Resolution – Take Down Notice

Copyright infringement is actionable by means of proceedings for a range of relief including an injunction and damages or account of profits against those infringing our copyright personally and against those who have control over the Forum.

However, we have no wish to take such action if this matter can be resolved swiftly and amicably within the time frame given below.

As you have control over the Forum, we require that the Forum be immediately removed from your website and that you take all reasonable steps to ensure that such infringing content is not posted on any of your services in the future. We would be grateful if you will confirm in writing on or before 4.00 pm on 09 August 2006 that the Forum has been removed. In the meantime, all our rights are expressly reserved.

Yours faithfully,

Caelend ers

Whois lookup for RAGEZONE.com.

Whois Server Version 2.0

Domain names in the .com and .net domains can now be registered
with many different competing registrars. Go to http://www.internic.net
for detailed information.

Domain Name: RAGEZONE.COM
Registrar: ENOM, INC.
Whois Server: whois.enom.com
Referral URL: http://www.enom.com
Name Server: NS2.RAGEZONE.COM
Name Server: NS1.RAGEZONE.COM
Status: REGISTRAR-LOCK
EPP Status: clientDeleteProhibited
EPP Status: clientTransferProhibited
EPP Status: clientUpdateProhibited
Updated Date: 26-Jun-2006
Creation Date: 14-Nov-2001
Expiration Date: 14-Nov-2009

>>> Last update of whois database: Fri, 21 Jul 2006 07:01:45 EDT <<<

NOTICE: The expiration date displayed in this record is the date the
registrar's sponsorship of the domain name registration in the registry is
currently set to expire. This date does not necessarily reflect the expiration
date of the domain name registrant's agreement with the sponsoring
registrar. Users may consult the sponsoring registrar's Whois database to
view the registrar's reported date of expiration for this registration.

TERMS OF USE: You are not authorized to access or query our Whois
database through the use of electronic processes that are high-volume and
automated except as reasonably necessary to register domain names or
modify existing registrations; the Data in VeriSign Global Registry
Services' ("VeriSign") Whois database is provided by VeriSign for
information purposes only, and to assist persons in obtaining information
about or related to a domain name registration record. VeriSign does not
guarantee its accuracy. By submitting a Whois query, you agree to abide
by the following terms of use: You agree that you may use this Data only
for lawful purposes and that under no circumstances will you use this Data
to: (1) allow, enable, or otherwise support the transmission of mass
unsolicited, commercial advertising or solicitations via e-mail, telephone,
or facsimile; or (2) enable high volume, automated, electronic processes
that apply to VeriSign (or its computer systems). The compilation,
repackaging, dissemination or other use of this Data is expressly
prohibited without the prior written consent of VeriSign. You agree not to
use electronic processes that are automated and high-volume to access or
query the Whois database except as reasonably necessary to register

domain names or modify existing registrations. VeriSign reserves the right to restrict your access to the Whois database in its sole discretion to ensure operational stability. VeriSign may restrict or terminate your access to the Whois database for failure to abide by these terms of use. VeriSign reserves the right to modify these terms at any time.

The Registry database contains ONLY .COM, .NET, .EDU domains and Registrars.

ok i hope this works :

First u need MSQL.... i have no link yet but ill give ya soon.

install it and start the Enterprise Manager like this:

603x489 119kb

450x714 64kb
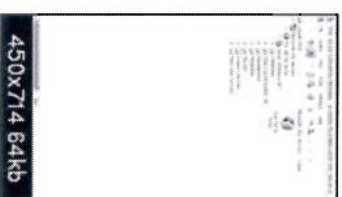

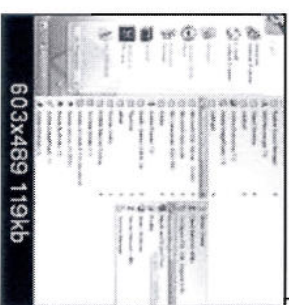

ok now create the following database names 😊 make sure u write it correctly)

exgame
rf_account
rf_world
rf_web

it should be like this if u rightclick:

How To make ur RF server online - RaGEZONE: The ultimate MMORPG resource and general discussion forums!

The server is running only in local mode, all connection from exterior is stopped after the world is selected.
I have tested all possibilities, the connection of client from exterior is possible only for creating account after the the world is appear and after clicking the world, the client is shut down, with no message...

Sry for my english 😊

How To make ur RF server online - RaGEZONE: The ultimate MMORPG resource and general discussion forums!

Page 5 of 15

Quote:

setup:-
First completely decompressed the document comes out.

Opens ODBC. REG, alters to the inside information you own. I did not say that detailed, own has a look to be supposed to be able to understand, is the database connection information!

Decompresses the rfdata.rar table of contents, comes out the inside 4 databases decompression, and the return to original state, the corresponding database name is: rf_account, rf_world, rfweb, exgame.

Opens RF_Bin under the table of contents the Initialize table of contents

Has 3 dispositions documents: AccountSystem.ini, LoginSystem.ini, WorldSystem.ini

Alters to you own information the inside establishment!

After changed may start the service end procedure! Altogether is 4 procedures!

perhaps this might help, check these files,ummmm what client u use for this game???perhaps u have the old one which of course wouldnt work......

anyway its kinda very difficult to make a server online behind a router in which other can connect to u,if u have a "Siemens Gigaset" or sth like that u can nearly forget it cause its real hard with this router....(and im using it, this damn thing xD)

All my friends who want connect to my server, can create account, juste the client shup down after selected the world (server).

If my friends can create any account and can select the world, then the connection is ready ??

sry for my english 😊

then u have to configure the map data perhaps, i think so cause if they can create an account
they can connect to u, but the worldserver seems to disconnect them automatically after they
want to go in....just search some arround the server file i look some too in there...perhaps i find
out sth, if not just search around this forum

im sure u get an answer if u look correct

ok, I understand what to do, but for some reason I get errors. When I try to restore rf_account and rf_world, I get the error "device activation error. The physical file name "d:\db\RF_User_Data.MDF" may be incorrect." The file cannot be restored." I get a different file name for rf_world, but the result is the same..any advice guys?

i know this problem too...... cause i installed the server on my computer and it worked fine......

and then i installed it on my fathers computer the same way but for some reason it didnt work.....

i just can say the normal things :
-control all database names,a wrong letter can damage all
-reinstall mssql, perhaps the installation didnt worked or u got a wrong version or ur download was damaged

im sry but i think i ask some friends perhaps they can help

sry again

:'(Im tryed out the server with my friend but the satelite (the menu) would not appear for him, and when he want to create a character its just exit from the client... is it server or client side problem

Where the satelite supposed to be, there is only a black background appears
